

## Emergency Care Summary (ECS) Quick Reference Guide

### What is Emergency Care Summary (ECS)

The Emergency Care Summary (ECS) is a subset of GP data held centrally in the SCI Store for every non-dissenting patient. It is intended to provide data for use in care contexts where clinicians do not have access to the core GP record eg Out of Hours, A & E.

### ECS Summary and Consent Status

To view the patient consent status, from Consultation Manager, select **List - ECS Summary Management**. The full patient's summary and consent status is initially hidden, but a summary for each service is indicated by the consent status traffic lights.

*Summary and Consent Status traffic lights*

The ECS Consent Status traffic lights indicate the following:

-  (inactive) ECS not enabled
-  (green) ECS enabled and consented to by this patient
-  (yellow) ECS enabled, implied consent for patient in the absence of a specific record
-  (red) ECS enabled, consent is denied for this particular patient

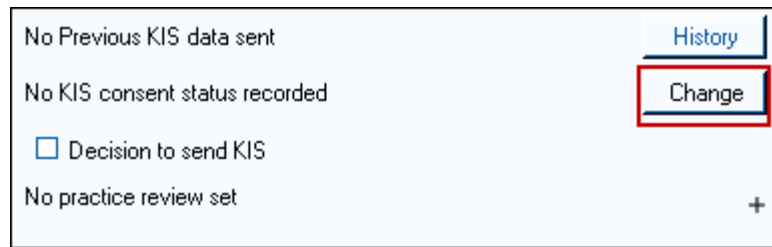

### Adding Consent Status for ECS

Consent for ECS is implied, therefore to stop the ECS extract from uploading to SCI Store, consent refused must be recorded.

### Recording Consent Refused for ECS

1. From Consultation Manager, select **List - ECS/PCS/KIS Summary Management - Summary and Consent Status**, select **More**.

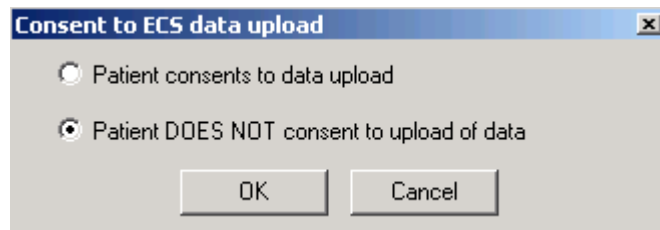

2. Click **Change** within the ECS column.

A screenshot of a software window titled "Summary and Consent Status - ECS". The window contains the following text: "No Previous KIS data sent", "No KIS consent status recorded", " Decision to send KIS", and "No practice review set". In the top right corner, there are two buttons: "History" and "Change". The "Change" button is highlighted with a red rectangular box.

*Summary and Consent Status - ECS*

3. **Consent to ECS data upload** is displayed.
4. Select **Patient DOES NOT consent to upload of data**.

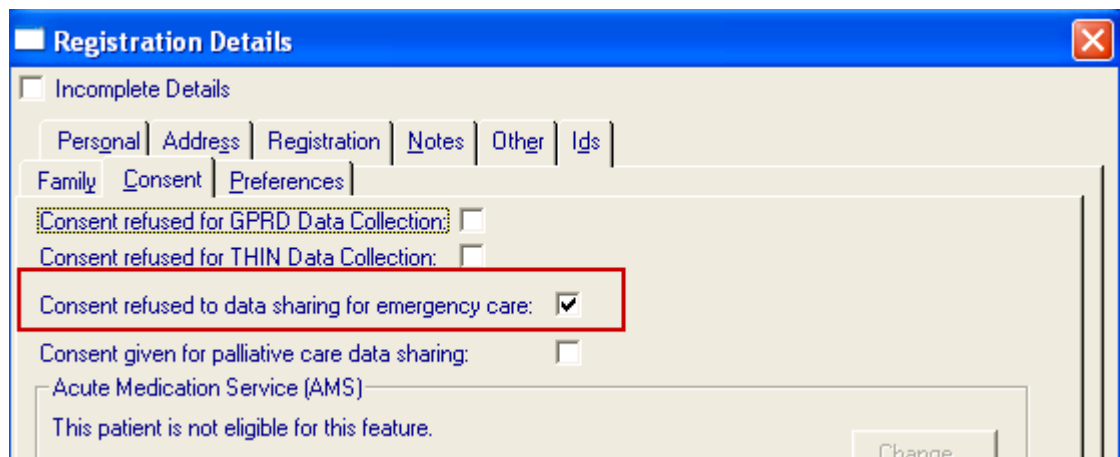

A screenshot of a dialog box titled "Consent to ECS data upload". It contains two radio button options: "Patient consents to data upload" (which is unselected) and "Patient DOES NOT consent to upload of data" (which is selected). At the bottom of the dialog box are two buttons: "OK" and "Cancel".

*Consent to ECS data upload*

5. Click **OK** to save and close.

The refusal is also within **Registration - Registration Details - Consent - Consent refused to data sharing for emergency care**.

A screenshot of a software window titled "Registration Details". The window has a blue header bar and a close button in the top right corner. Below the header, there is a section for "Incomplete Details" with several tabs: "Personal", "Address", "Registration", "Notes", "Other", "Ids", "Family", "Consent", and "Preferences". The "Consent" tab is selected. Under the "Consent" tab, there are several checkboxes: "Consent refused for GPRD Data Collection:" (unchecked), "Consent refused for THIN Data Collection:" (unchecked), "Consent refused to data sharing for emergency care:" (checked), and "Consent given for palliative care data sharing:" (unchecked). The "Consent refused to data sharing for emergency care:" checkbox is highlighted with a red rectangular box. Below these checkboxes, there is a section for "Acute Medication Service (AMS)" with the text "This patient is not eligible for this feature." and a "Change..." button.

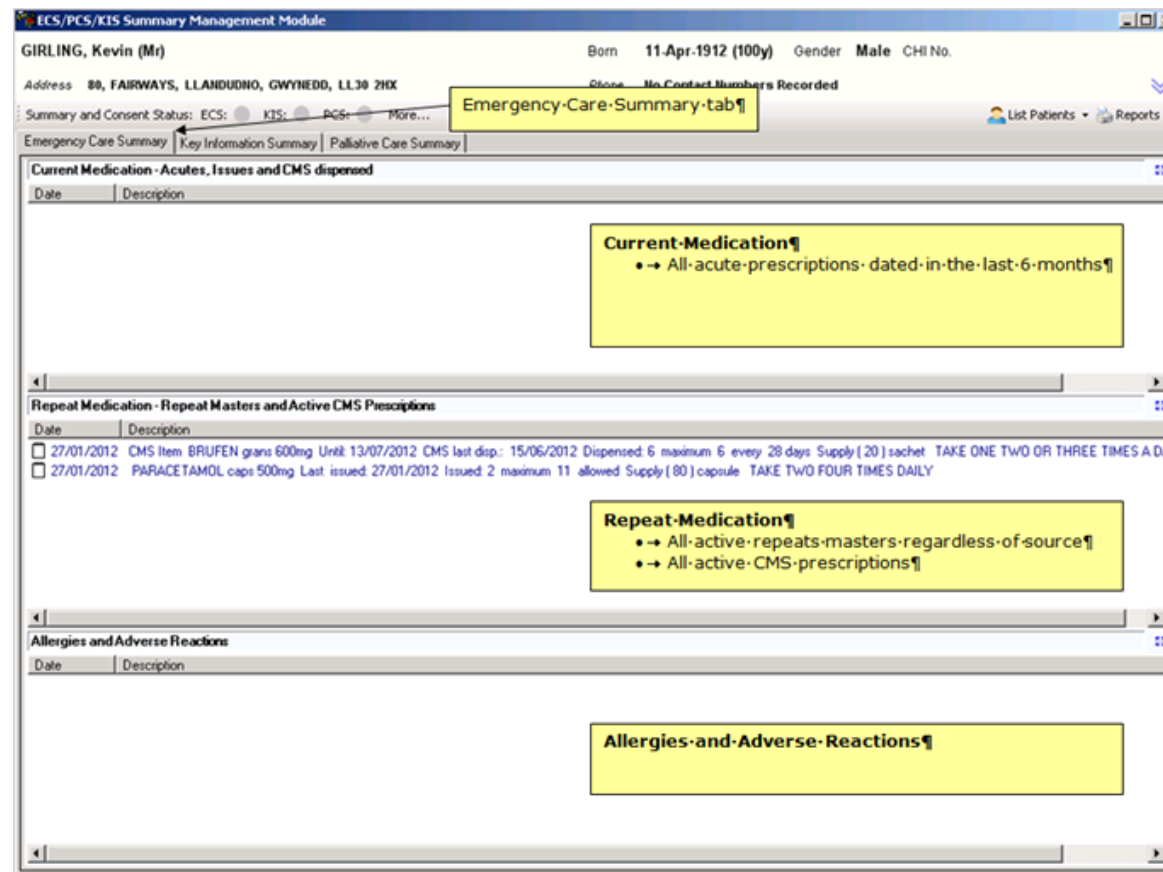

*Registration Details - Consent - Consent refused to data sharing for emergency care*

**Note** - The ECS Status traffic light automatically turns from Green to Red, and if the patient had given KIS consent in the past, this also changes to Red as it is dependent on ECS consent.

## Emergency Care Summary Screen

The ECS screen is accessed from **Consultation Manager - List - ECS Summary Management**. Click on the **Emergency Care Summary** tab to view.
