

Register Check Report

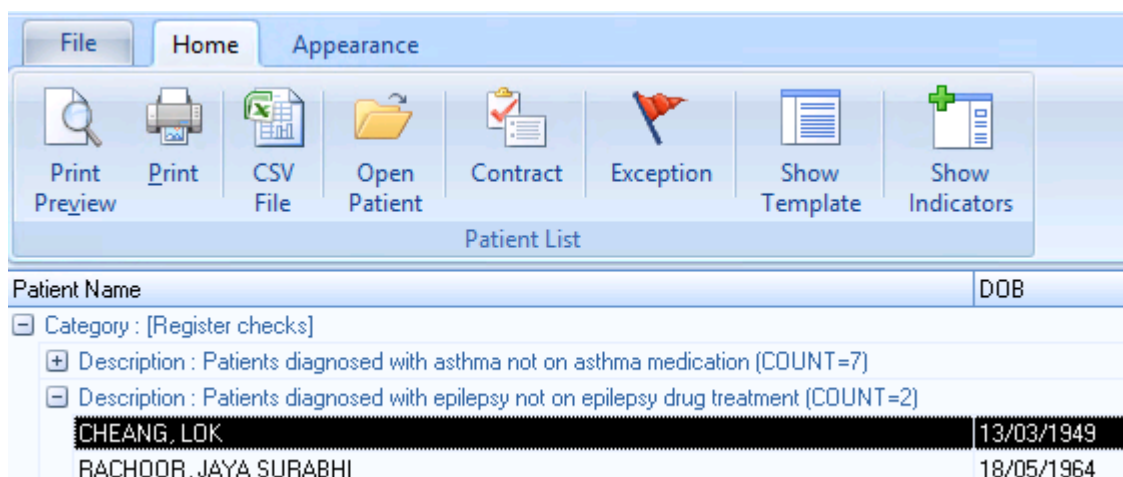

This report is used to align drugs prescribed with a diagnostic code. For example, patients who have a diagnosis of Asthma but have not been prescribed asthma medication in the last 6 months.

1. Select **Register checks** [\[Register checks\]](#) from **Patient Reports**.
2. Either highlight the indicator line and choose the option to **Merge Indicator**, which allows you to send a recall letter to all the patients. Or save the report line as a group by selecting **Add Patient Group**.

Register checks

3. Alternatively, you can double click on the indicator line or choose the expand icon to view the patients and add the relevant data using the Toolbar.
